Student Assistant [EUPASMOS Project](#)

Adminstrating interviews and instructing respondents participating in a study monitoring physical activity of the Dutch population

May 2018 - July 2019

WHY STATISTICS?

I thoroughly enjoy disentangling a certain subject. Getting to the bottom of something yields a lot of satisfaction, and is a process I find very enjoyable. I find this to, especially uphold, for statistical research. The 'rabbit-hole' like nature of statistics implies that there is always so much more to learn. My path down through the *rabbit-hole* is a journey that will hopefully never cease to exist. It is a journey that, I hope, I am able to pursue further and further in the rest of my career. For it provides me the most professional *satisfaction*

SKILLS

- **Computer Skills**

R, Python, SPSS, C# (Basic), PyTorch Deep-learning

- **Programming Practices**

Functional Programming, Object Oriented Programming

- **Spoken Languages**

Dutch (native), English, German, Mandarin (Basic)

HOBBIES & INTERESTS
