  May 2018 - July 2019

WHY STATISTICS?

I thoroughly enjoy disentangling a certain subject. Getting to the bottom of something yields a lot of satisfaction, and is a process I find very enjoyable. I find this to, especially uphold, for statistical research. The *'rabbit-hole'* like nature of statistics implies that there is always so much more to learn. My path down through the *rabbit-hole* is a journey that will hopefully never cease to exist. It is a journey that, I hope, I am able to pursue further in the rest of my career.

SKILLS

- **Computer Skills**
  R , Python, SPSS, C# (Basic), PyTorch Deep-learning

- **Programming Practices**
  Functional Programming, Object Oriented Programming

- **Spoken Languages**
  Dutch (native), English, German, Mandarin (Basic)

HOBBIES & INTERESTS

Hiking   Reading   Philosophy, Spirituality   Three Seven Nine One
